REASONS FOR ALLOWANCE

Claims 1, 4, 8, 19, 22, 24, 26, 37, 39, 41, 42, 43, 47, 48, 49 and 53, renumbered as 1-17, are allowable over the prior art of record.

The Examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims.

One such prior art is the U. S. Patent No. 6,374,402, issued to Schmeidler et al. Schmeidler teaches, in part, a method of processing a data stream with a computer system, the method comprising: receiving the data stream using a browser application, detecting a content type of data in the data stream and temporarily overriding a default rendering process otherwise associated with the content type detected for the data in the data stream.

Another such prior art is the U. S. Patent No. 7,017,189, issued to DeMello et al. DeMello is directed to a system and a method for activating a rendering device, and teaches determining whether the browser application is invoked within an application environment of an internet service provider to enable a subscriber of the internet service provider access to an online resource.

However, neither Schmeidler nor DeMello, either separately or in combination, teach temporarily overriding the default rendering process identified in the registry of the computer includes changing the registry of the computer such that the default rendering process identified in the registry of the computer and associated with the content type of data in the data stream is replaced with the particular rendering process if the browser application is determined to have been invoked within the application environment of the internet service provider.
